

NARVA® PRODUCT UPGRADE

'Continual Product Improvement'

September 2009

P/No. 71312 Rechargeable L.E.D Lamp

Now with a lithium battery

Narva's 71312 has received a battery upgrade and is now powered by lithium technology.

Lithium batteries hold their charge for longer, have longer shelf life and have no memory effect, making them ideal for applications where regular charging is not convenient or possible. The updated 71312 delivers all the performance and features of the previous model.

- 4 hours of use at 600 lumens peak output
- Lithium battery with no memory effect
- 240V AC and 12/24V DC charger supplied
- Weatherproof rubber body and switch
- Fold away metal swivel hook
- Shockproof and resistant to oils and grease

New Spare Parts to suit 71312 (Lithium)

P/No:	Description:	Barcode:
