September 2009

## L.E.D FLOOD BEAM WORK LAMP

### **A powerful L.E.D flood lamp suitable for a wide range of applications**

Suitable for agricultural and transport applications, the new 72449 L.E.D lamp outputs 850 lumens of light in a powerful flood beam. The whiter light produced by L.E.D provides a smoother spread of light and is easier on the eye, creating a safer work environment when used for extended periods of time. With no filament to break, the 72449 is resistant to shock and vibration and offers increased reliability and service life. The 72449 comes packed in an attractive retail blister ideal for hang-sell or free standing displays.
