

NARVA® NEW PRODUCT RELEASE

August 2009

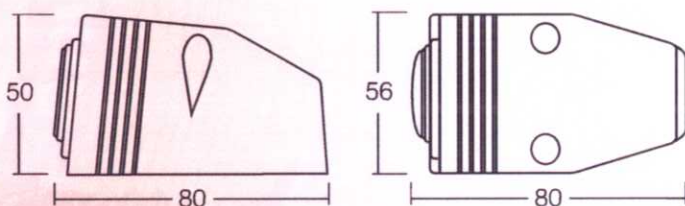

SURFACE MOUNT ACCESSORY SOCKET

Smart and compact surface mountable cigarette lighter accessory socket ideal for caravans and R.V.s

Suitable for modern caravans and recreational vehicles, the 81025W makes installing an accessory socket a breeze.

With many caravan manufacturers opting for thinner wall materials and plastic mouldings, a surface mounted socket is much more convenient as opposed to traditional sockets that require deeper cavities for installation and wiring. The socket accepts all types of cigarette lighter plugs used for all manner of accessories.

Featuring a styled white plastic housing, the 81025W can be mounted internally or externally as required and includes a dustproof rubber cover.
