

NARVA® NEW PRODUCT RELEASE

Issue 1: June 2009

'DELTA' L.E.D WORK LAMP

**9-36V
MULTI-VOLTAGE**

All lamps feature multi-voltage circuitry and 1m of hard wired cable to suit 12 and 24 volt vehicles and machinery.

2000 LUMEN

Despite its compact size, the Delta produces a powerful 2000 lumens of light in either a flood or long range spread beam ideal for large and spacious work areas and equipment.

**WHITER
LIGHT**

Fitted with 10 x 2W ultra-white L.E.Ds, the Delta's light output increases work site safety reducing eye fatigue for workers and machine operators. Instantaneous L.E.D operation gives full brightness with no warm up period.

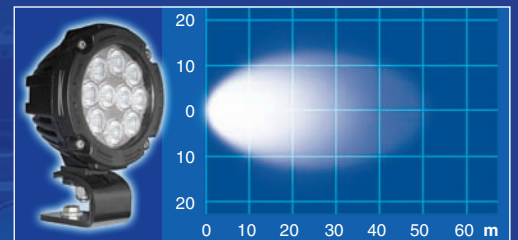

IP67

Fully sealed with an IP67 rating, the Delta features a die-cast, powder coated aluminium housing and 4mm steel mounting bracket. Ideal for the most grueling environments. Impact and vibration resistant.

AVAILABLE IN

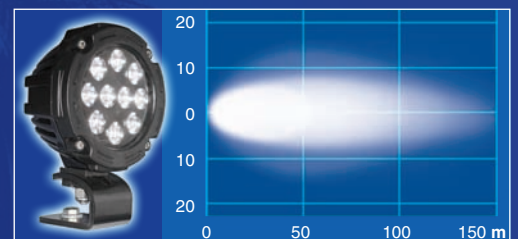

Delta L.E.D Work Lamp, Flood Beam

P/No: 72466
Barcode: 9314464724664
Availability: Ex-stock

Delta L.E.D Work Lamp, Long Range Spread Beam

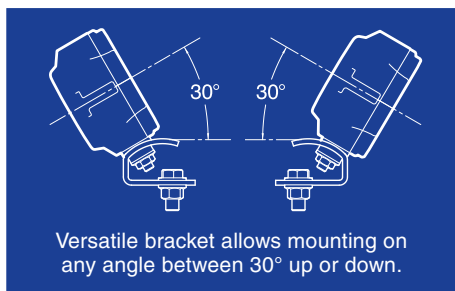

P/No: 72467
Barcode: 9314464724671
Availability: Ex-stock

Multi-Angle Mounting Bracket

Delta's heavy duty 4mm steel 'arciform' bracket provides an adjustable mounting angle anywhere between 30° up and 30° down. Its rigid construction provides extreme strength and stability with a dual bolt system for easy adjustment. Includes stainless steel bolts.

Robust Construction

Designed for the most grueling environments, the Delta is constructed from an IP67 rated die-cast powder coated aluminium housing, a virtually unbreakable polycarbonate lens and solid state circuitry. The Delta is impact resistant and impervious to vibration, ideal for applications such as mining, agriculture and earth moving.

Ultra Reliable L.E.D Technology

The use of L.E.D means there is no filament to break, increasing reliability and service life. The Delta is a cost effective solution for mining, forestry and transport where downtime and maintenance costs need to be kept to a minimum.

Whiter, Brighter Light

The Delta utilises 10 x 2 watt high powered L.E.Ds and produces an impressive 2000 lumens of light. The whiter light from L.E.D puts less strain on the eye, increasing safety when used for long periods of time. Another feature of L.E.D is its 'instant-on' operation, producing full brightness with no warm up period.

The whiter light of L.E.D (right) can clearly be seen in comparison to the conventional lamp (left)

5 Year L.E.D* Warranty *This warranty guarantees the operation of the L.E.D lamp for a period of 5 years and does not cover physical damage or abuse.

SPECIFICATIONS

Delta 72466/72467

Light Output	2000 Lumens
Nominal Voltage	9-36V DC
Power Consumption	21W at 12V
Nominal Current at 12V	1.75 A
Nominal Current at 24V	0.85 A
Electronics	Integrated-Epoxy Encapsulated
Mount	4mm steel bracket 2 x M10 bolts
Lens	Polycarbonate
Body	Die-cast aluminium
Weight	1.6kg
IP Rating	IP67
Operating Temperature	-40°C to 50°C
